PROFILE SUMMARY

Economics and Management undergraduate (**Business and Management** track) with hands-on experience in data analytics and pricing strategy, combining Python, SQL, and Power BI to drive measurable commercial impact — including a 5% gross margin improvement across 50+ SKUs. Skilled at building end-to-end data pipelines, automating reporting, and translating complex datasets into clear, decision-ready insights for cross-functional stakeholders. Currently deepening quantitative and financial analysis skills through a selective investment banking society, with a strong interest in applying data-driven rigor to strategy consulting and financial services.

PROFESSIONAL EXPERIENCE

Kilometr Zvuka (Audio Retailer) – Pricing Analyst February 2025 – Present

- Evaluated market developments and competitor data to formulate dynamic pricing strategies for 50+ SKUs, driving a 5% increase in gross profit margins.
- Collaborated across Sales and Marketing teams to align pricing structures, acting as an internal advocate for standardized policies.

MpFinance – BI analyst June 2025 – January 2026

- Spearheaded a reporting automation initiative by developing 10+ dynamic Power BI dashboards, serving as internal knowledge bases for senior stakeholders.
- Engineered a unified data architecture integrating SQL and Google Analytics streams, establishing a single source of truth to track key organizational metrics.
- Onboarded 2 junior analysts in DAX and Power Query, scaling the team's analytical capacity.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Siena Quantitative and Investment Banking Society (SQIBS) - Siena – Analyst January 2026 – Present

- Selected member of a student-led team applying quantitative methods to evaluate market trends and sector fundamentals, producing presentation materials for peer review.
- Leverage SQL and Python to support applied research projects, translating complex data into actionable talking points for investment discussions.

Skillbox

PROJECT EXPERIENCE

Automated Research-Tracking Pipeline

- Built an automated pipeline to filter, tag, and track publications using keyword-search filters and structured databases — directly applicable to automating data-monitoring and reporting workflows.

[Operational Efficiency Study: Urban Mobility for statistics class](#)

- Performed EDA on usage patterns (seasonality, weather, time-of-day) and developed insights to inform operational improvements.

[E-commerce Data Mart & Analytics Pipeline for AiDigital](#)

- Engineered an ETL pipeline to clean mixed data types and ensure 100% timestamp consistency, upholding data protection and governance standards.
